The local newspapers have been discussing the bridge question during the past few days with special reference to the superiority of stone bridges. The subject is one in which the whole county is interested. There is no question but that the old stone bridges are better than the new ones. The new ones are a great improvement in the long run than the modern iron structures. Some of these old bridges have withstood the storms and floods of a century and are still intact, whereas the new bridges are ever needing repairs in the way of paint and planks.

On Sunday, the close of the Jewish harvest festival, or Succoth, as it is termed, the founders and patrons of the National Farm School celebrated the occasion by visiting the institution. An interesting program was carried out, the chief feature of which was the address of Dr. Krauskopf, founder and president. He spoke of the discontent in the field of labor in which the Jew is concerned, with its sweet shops and unquenchable thirst and deprivation, and urged that this, above all times, is the period in which the Hebrew should turn his attention to agriculture. It would mean, he said, the physical and moral redemption of his race.

The Board accepted the offer of a flag from the Daughters of Liberty. The presentation will take place Saturday evening, when Hon. Robert M. In consequence of the finding of the Coroner's jury in the case of Samuel Young, who was found dead in a public road north of town last week, a warrant was sworn out Thursday for the arrest of Harry McCord, bartender at the Cross Keys Hotel, where Young had obtained the liquor that led to his death by a fall from his wagon. McCord was charged with involuntary manslaughter and furnishing liquor to a drunken person.

The liquor laws made to the detriment of the community are being enforced with more vigor than ever. The case is likely to attract as much attention as did the Larsen affair, at Jamison. A rather interesting equity proceeding took place before Judge Yerkes on Monday. It was instituted by citizens of Rockhill against the Rockhill Industrial Company. The company had obtained a charter to quarry and erect stone and leased barren land in a sparsely settled portion of the township. Instead of conducting a stone breaking plant they set up machinery to break steel, the principal product being dynamite. Huge blocks of steel were sent to the works from Bethlehem and the Midlands works, which were blasted into fragments weighing from one to four tons. The neighbors complained that missiles were hurled in all directions, and that the company was restrained from operating the plant. The company claimed that all danger had been eliminated by the construction of a new pit in which the steel was blasted. A great many witnesses were called by both sides. The steel is placed in a pit eight or ten feet deep, covered with heavy timbers and then the dynamite is applied. Before the new pit was constructed the steel was thrown a great distance at times. The court directed that the defendant company take such precaution as would prevent a recurrence of this. John C. Swartzley, Esq., represented the plaintiffs who are property owners. Grim and Grinn, of Doylestown, and W. H. Lenzler, of Norristown, represented the company.
